# 1 INTRODUCTION

A website is a collection of many web pages and webpages are written in a language called HTML. (GeeksforGeeks, 2023) HTML stands for Hyper Text Markup Language. A markup language is a system for representing text that defines its structure, appearance, and behavior. It consists of multiple tags. The complete process of making a website is called web development. Web development consists of several processes some of which are planning, designing, Development, etc. Creating the website for the printer was our task and we made five different pages. They are Home, About, Product, Blog, and Research.

## 1.1 Our goals and motives

The primary goal of this coursework is to understand the theoretical knowledge acquired throughout the web development course by creating a functional printer website. The objectives include enhancing skills in web development, design, and problem-solving through this project.

The main task was to create an e-commerce website that stores and sells various types of printers. The coursework also emphasizes project management, creativity, and innovation in the field of web development. We have to use technologies such as HTML, CSS, and JavaScript. The coursework's goal is not only to deliver a website but also to develop a deeper understanding of the web development process. It also encourages critical thinking and problem-solving by addressing challenges that may arise during the development process. By the end of this coursework, the aim is to have a fully operational printer website that reflects the skills and knowledge acquired throughout the coursework.

## 2 Technologies used in coursework.

### 2.1 HTML

HTML stands for Hyper Text Markup Language which is not a programming language. It is used to create a webpage by using different elements like `<br>` `<p>` `<h>` tags which are designed the structure of webpages tags tells the browser how to show the content. HTML allows users to insert video, audio, image, and other multimedia content to make a webpage attractive. HTML is open-source and can be used for free compared to other programming languages it is easy to learn. HTML is accessed by all types of browsers similarly, we used HTML in our project to make webpages because it is easy to learn for beginners, and it is unreadable rather than programming syntax which is used by professionals. (W3schools, 2024)

we use HTML to arrange images, format text, and incorporate other multimedia elements when creating a website. Here are the basic tags that we use to create webpages:`<ul>`, `<li>`, `<nav>`, `<section>`, `<img>`, `<div>`, `<!-->` for comments, all contributing to making a webpage attractive. HTML is an open-source language that is free of cost compared to other programming languages, and it is easy for us to learn and use. We choose HTML because it is accessible on all types of browsers. In our project, we utilized HTML to create webpages, as it is beginner-friendly and has a more readable syntax compared to programming languages used by professionals.

*Figure 1: HTML*

## 2.2 CSS

CSS stands for cascading style sheet which is used to design web pages by changing their attributes. It is stored in a separate file called CSS file which controls the overall Website using a single file. It allows adjustment in any device. CSS can be done inside HTML file by `<style>` tag or by overriding. (W3schools, 2024)

In our project, we use CSS by including some `<style>` tags in the head section or linking to an external CSS file using `<link>` tag. We also employ properties such as margin, border, padding, and width/height to control the layout and spacing of the elements in the CSS file. Similarly, top, left, right, and bottom properties are utilized to control the positioning of elements. Common values for the position property used in our CSS are relative. To customize color and typography, we use properties like color, font-family, font-size. By combining these CSS properties, we control the color, typography, and overall visual appearance of our website.

### Types of CSS:

- **Inline CSS**
- **Internal CSS**
- **External CSS**

*Figure 2: CSS*

## 2.3 JavaScript

JavaScript is a lightweight programming language used by a web developer. It is popular for its flexibility in creating dynamic and interactive web pages. It operates primarily on the client side, executing in users' web browsers to modify web page content and behavior. Usually, JavaScript is written in two ways: internal and external. Internal can be written directly in an HTML file, while external is written in a separate file by using a .js extension and then linked to the main code. (MDN Web Docs, 2024).

*Figure 3: JavaScript*

## 2.4 Visual Studio code (VSU)

Visual Studio Code is a source code editor which is developed by Microsoft. It is available for multiple platforms like Windows, Linux, and macOS. One of the key strengths of Visual Studio Code lies in its built-in support for JavaScript, TypeScript, and Node.js. Visual Studio Code includes basic support for most common programming languages which includes syntax highlighting, bracket matching, code folding, and configurable snippets. We use Visual Studio because of its features.

*Figure 4: VSU*

## 2.5 Balsamiq

Balsamiq is a wireframing tool designed for creating mockups and wireframes for websites, and web applications. We use this tool because it is straightforward to use for beginners. By using drag and drop interface have can visualize our ideas and concepts. We use it for a blueprint which we have done before doing coding. It helps us to have a clear view of how it is going to be made after doing the coding. We use the Balsamiq tool for wireframing because of its features. It allows us to save our work regularly, ensuring that we don't risk losing our project, as it automatically saves our work in the cloud, providing a backup of our project. Once we finish our work, we can easily export it in various formats like PDF or images, making it simpler compared to other tools. Similarly, we can customize elements by adjusting properties like size, color, and text. Balsamiq provides us with a simple and quick wireframing experience.

*Figure 5: Balsamiq*

### **3 VERDICT**

In conclusion, our dedicated team collaborated to work effectively to showcase a mix of web development skills and creative talents. We tried to make a visually appealing website. We decided to give “printer junction” as a name for our website. At last, we decided to make five different pages for our website.

The homepage serves as an introduction page, featuring four more navigational menus. The About page incorporates a detailed introduction about our printer website and our team introduction. The product page is dedicated to showcasing various products related to printers. Each product comes with a comprehensive description and its price and at the bottom of the product page we have arranged to make a form from where we can get feedback from customers. The research page involves a comparative analysis of other websites. It provides an insight into our website, from where we were inspired. The Blog page offers a summary of various topics. We have included topics like printers’s past and present, and how technology has affected daily life and business.

## **4 OUR WEBSITE**

### **4.1 Home page**

The homepage acts as the main gateway of entry for viewers on a website, presenting them with the initial interface when they start browsing. The homepage provides an overview of its contents, making navigation easier for those looking for specific services or information. A typical homepage includes elements such as a header with the website's logo and contact information, including email and address. On the homepage, there are four main navigational menus: About Us, Blog, Product, and Research. The header of our homepage features the website's name (Printer Junction). Information about the printer and its types is also provided on the homepage. we have created a form for users to sign up, and they can also create their accounts. The footer contains valuable information about our store's location, links to our social media profiles, ongoing offers, and our store's privacy policy. This comprehensive footer enhances the overall accessibility and usability of our website.

Screenshots of index page with wireframing:

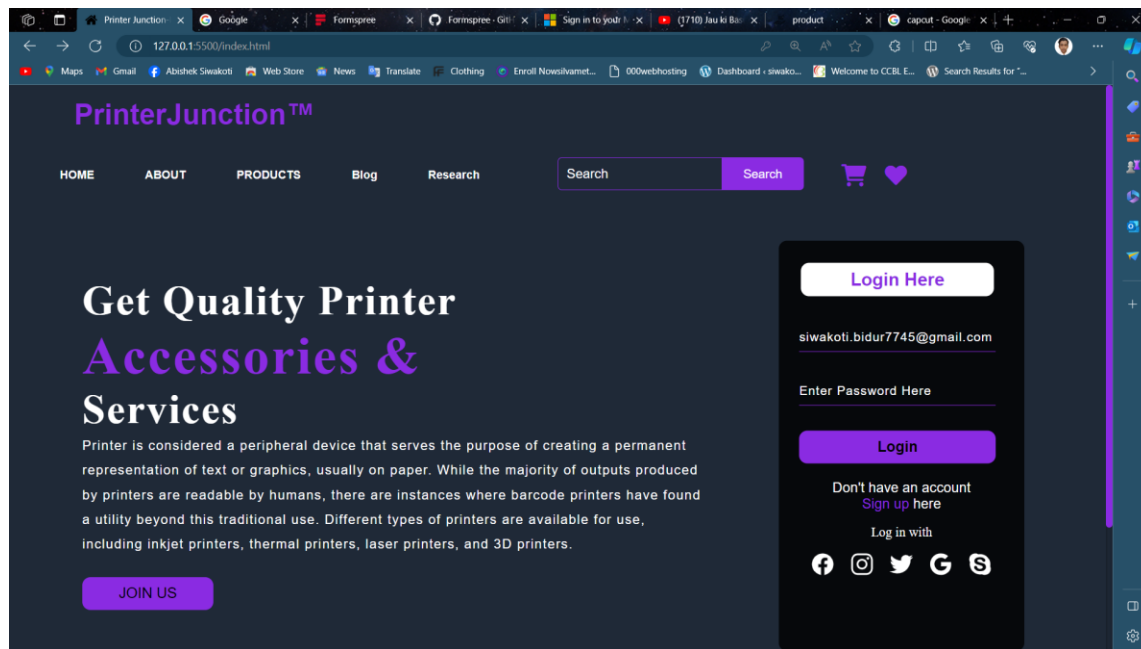

Figure 6: index page

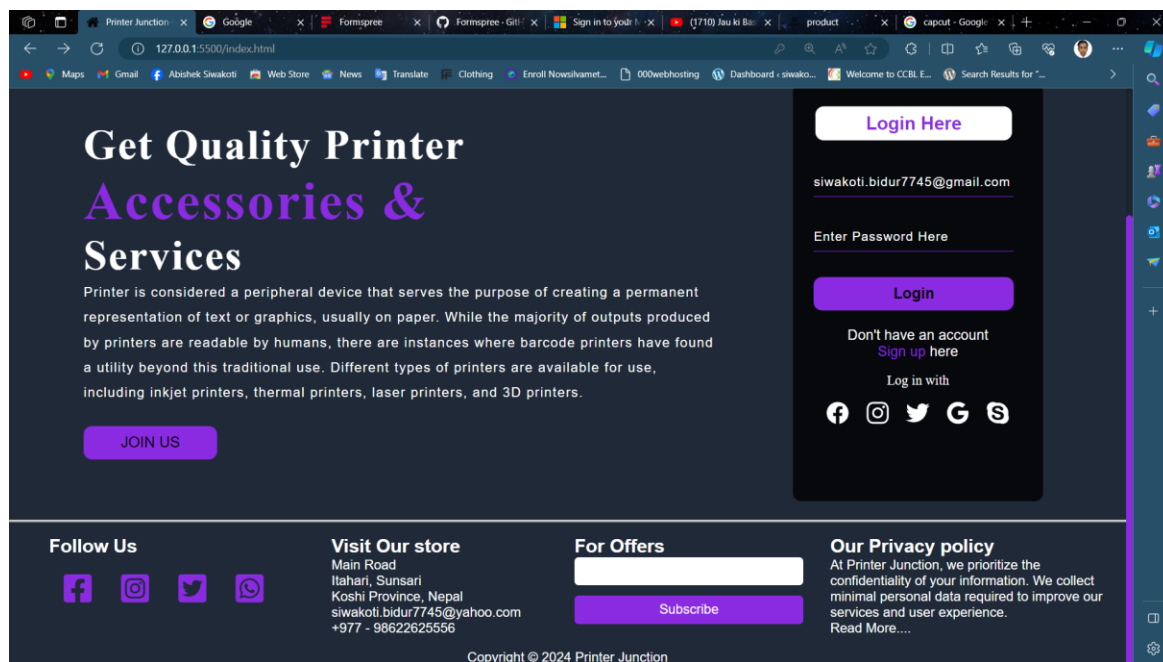

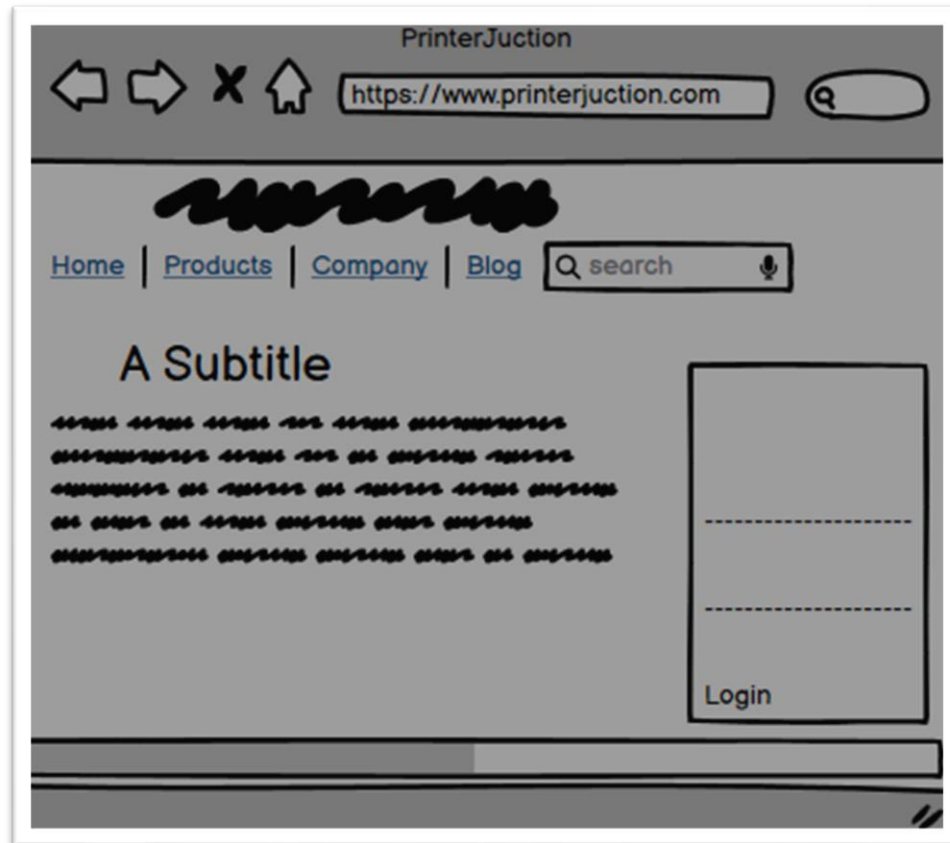

Figure 7: index page 2

*Figure 8: wireframing of index page*

## 4.2 Blog page

A blog page is a section of a website dedicated to sharing and updating articles or essential information. It serves as a platform where individuals, companies, or groups can exchange news, insights, information, and various types of content with their audiences or users. Similarly, we have also provided information about the impact of technology on our daily lives and businesses. Additionally, we explore the evolution of printers: from human beginnings to modern marvels.

Below are the screenshots and wireframing of this page.

Our technology & it's Impact

### The Impact of Technology on Our Daily Lives

smartphones and social media has revolutionized how we stay connected globally. The workplace has embraced remote collaboration and automation, enhancing productivity. Education has evolved with online platforms and immersive technologies like VR and AR.

Healthcare benefits from telemedicine, wearables, and personalized medicine. Entertainment has gone digital, with streaming services and online gaming dominating. As technology continues to shape our lives, it's essential to navigate these changes responsibly, ensuring that advancements enhance rather than detract from the human experience.

### The Impact of Technology in Business

insights for market adaptation. E-commerce and digital transformations redefine customer engagement through personalized experiences for loyalty.

Yet, this technological reliance poses cybersecurity challenges that demand robust protective measures. Amidst these challenges, technology empowers businesses to remain agile and innovative, embracing methodologies like agile development and emerging technologies such as AI and IoT. Navigating this evolving technological landscape is crucial for businesses to thrive in the competitive global economy, demanding adaptability and responsible use of technological advancements.

The Evolution of Printers: From Humble Beginnings to Modern Marvels

### The Past - An Ode to the Early Days of Printing

In the annals of technological history, the printer stands as a silent witness to a remarkable journey of innovation and progress. The roots of printing can be traced back to ancient China, where woodblocks were used to transfer ink onto paper. Fast forward to the 15th century, and the invention of the printing press by Johannes Gutenberg revolutionized the way information was disseminated.

This mechanical marvel allowed for the mass production of books and played a pivotal role in the Renaissance and the spread of knowledge.

### The Present - Printers in the Digital Age

In today's digital era, printers have undergone a profound transformation, evolving into sleek, multifunctional devices seamlessly integrated with our daily lives. Modern inkjet and laser printers deliver high-quality prints with remarkable precision and speed, while wireless connectivity enables effortless printing from a variety of devices. The advent of 3D printing has revolutionized manufacturing and unleashed creative possibilities, allowing for the creation of intricate physical objects layer by layer. The current emphasis on sustainability has also influenced the development of eco-friendly printers, incorporating energy-efficient technologies and recycled materials.

### 4.3 Research page

A Research page is a section of a website specialized to displaying and sharing content related to research can be referred to as a research page. This page is frequently made to give readers access to information articles, reports, studies, and other research resource. According to the type of website and its purpose, the information featured on a research page may vary significantly.

To gain a better understanding of the visual and user experience features of e-commerce websites, we examined our website and included three photographs from platforms like Daraz. After conducting extensive research and finding inspiration from those websites, most of the features on our website were created by us. However, some parts and features bear similarities to websites we found during the research and drew ideas from.

On this research page, we compared our landing page with the one that inspired us, and we also provided information on how research assisted us in completing our project. Additionally, we showcased our product page and compared it with the page that was inspired by where we blueprinted our product page. Similarly, we compared our team section with the inspired team section, sharing details about the channels from which we gathered valuable sources to complete our team section.

Below are the screenshots and wireframing of Research page:

### Our Landing Page VS Inspired Landing Page

#### Our Landing page

Creating the index page for any website is a crucial task, and finding the right balance between simplicity and attractiveness is key. Despite our extensive research, generating ideas proved challenging initially. Fortunately, inspiration struck when we stumbled upon an image on the internet, providing valuable insights into an effective index page design. We've implemented this inspiration, ensuring our index page is straightforward and user-friendly. Notably, we've included a login form on the index page to prioritize the confidentiality of customer information. We express our gratitude to the creator of the image that sparked our ideas, as it significantly contributed to the design of our website. Our approach involves collecting only essential personal data required to enhance our services and improve user experiences.

#### Inspired Landing page

### Our Product Page And Daraz Product Page

#### Our Product Page

After successfully creating our index and about us pages, we encountered a roadblock when it came to designing our product page. Initially, we struggled to come up with ideas. However, one day, inspiration struck when we looked at Daraz, Nepal's leading e-commerce platform. We examined Daraz's website code through inspecting elements and sought guidance on YouTube to enhance our understanding of creating an effective product page. Through persistent hard work and dedication, we finally managed to craft the product page for our website. I want to express sincere gratitude to the YouTuber and platforms like Daraz, as they played a crucial role in providing the inspiration and insights we needed to bring our product page to life.

#### Daraz Product

### Our Team Section Vs Inspired Team Section

#### Our Team section

I want to express my sincere gratitude to the YouTuber Crown Coder who shared the informative video on building a team section for a website which served as a valuable source of inspiration for my website's team section. I want to clarify that while I used inspiration from the video, I did not engage in direct copy-pasting of content. The techniques and design elements used in my project are a result of my understanding and reinterpretation of the concepts shared in the video. Thank you for providing such educational content in the web development community.

#### Inspired Team section

### "The Making of Our Project: Why, How, and Our Dedication"

Our project began with questions and a spark of creativity. We wanted to understand why things work the way they do and how we could make them better. So, we dove into research, tested ideas, and poured our hearts into every step. Our dedication was unwavering we wanted to create something truly exceptional. This project is our journey, fueled by a passion for innovation and a commitment to pushing limits. It's a testament to our drive to make things not just good, but extraordinary. Thanks to AI assistants like Chat GPT, online resources like W3Schools, e-commerce platforms like Daraz, and YouTubers who provide guidance and inspiration, We were able to gather valuable information, learn about coding, design elements, and project management, making this project possible. Their wealth of knowledge and insights played a crucial role in achieving our goals.

## 4.4 Product page

To assist customers in making informed decisions, our product page is strategically designed to highlight key features, specifications, visuals, and pricing. For customer inquiries by facilitating clear and compelling communication through the Printer Junction customer service department where customers can clear their inquiries. This service includes collecting essential customer details such as email, name, purchase date, address, and other necessary information. we've added a search icon to enhance the customer experience, enabling them to easily find specific printer types like HP LaserJet Pro, Canon PIXMA, and Epson. Our website encourages customer engagement through feedback and reviews allowing those who have purchased the product can give feedback form that we have inserted a star logo feature for this purpose. Additionally, we have added an icon add to cart button, the process of adding products to their shopping cart.

Figure 14: Product page

## 4.5 About us

The About Us page usually contains information on the team members, history, mission, beliefs, and other important details that help visitors understand of goals and identities of the company or people in charge of the website. Similarly, On our “About Us” page, we present the reasons for customers choose our printers. We also highlight the collaborative efforts of our team members, detailing how each individual has contributed to the successful completion of our project. In the footer section, we showcase the portfolios of each team member.

## 5 Testing

### 5.1 Test 1: JavaScript order conformation

*Table 1: Testing order conformation*

Objective	To display a confirmation pop-up while clicking the “Order” button.
Action	First, open the website and move to the product page after that click the order button to place a printer order.
Expected Result	The popup should appear
Actual Result	The pop appeared successfully.
Test	Test successful

Below are the screenshots of this testing:

*Figure 6: Before clicking the order button*

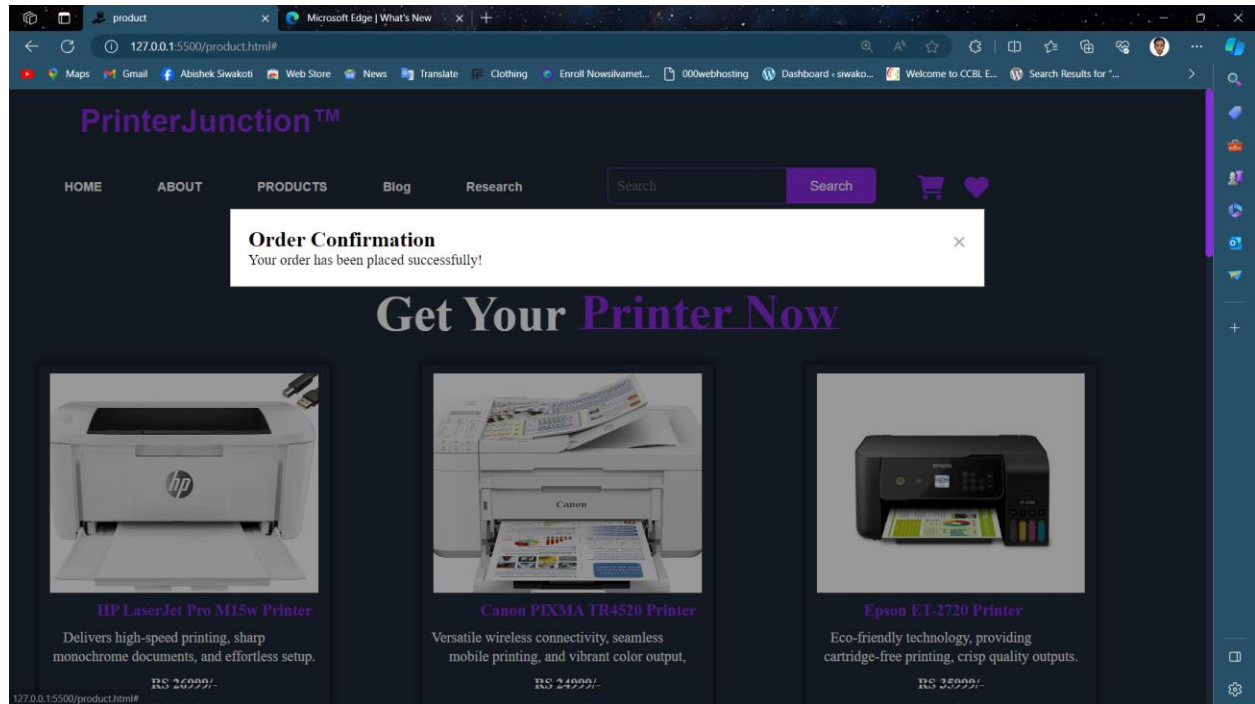

Figure 7: After clicking the order button.

## 5.2 Test 2: JavaScript form action

Table 2: Testing form action

Objective	To get a response after submitting the feedback form.
Action	Navigate to the product page fill out the feedback form and click the “Get support” button.
Expected Result	The pop-up should appear after clicking the submit button
Actual Result	The pop-up appeared successfully.
Test	Test successful

Below are the screenshots used in this testing:

The screenshot shows a web browser window with the URL `127.0.0.1:5500/product.html#`. The page title is "Help & Support". On the left, there is an illustration of a person wearing a headset with a microphone, and a blue button labeled "SUPPORT". The main form area contains the following fields:

- Name:**
- Email:**
- Contact Number:**
- Date of Purchase:**
- Your Order:**
- Address:**

Below the form is a purple button labeled "Get Support". The footer of the page contains four sections:

- Follow Us:** Icons for Facebook, Instagram, Twitter, and WhatsApp.
- Visit Our store:** Main Road, Itahari, Sunsari, Koshi Province, Nepal. Email: `siwakoti.bidur7745@yahoo.com`. Phone: `+977 - 98622625556`.
- For Offers:** A text input field with "Your email id here" and a purple "Subscribe" button.
- Our Privacy policy:** Text stating "At Printer Junction, we prioritize the confidentiality of your information. We collect minimal personal data required to improve our services and user experience. Read More...."

At the bottom center, it says "Copyright © 2024 Printer Junction".

### 5.3 Test 3: JavaScript typewriter

Table 3: Testing JS typewriter

Objective	To check typewriter will work or not
Action	Navigate to bidur's portfolio webpage and Look weather the type writer will work or not.
Expected Result	It should work as expected.
Actual Result	It works
Test	Test successful

Below are the screenshots used in this testing:

```
<script src="https://unpkg.com/typed.js@2.0.16/dist/typed.umd.js"></script>
<script>
  var typed = new Typed('#element', {
    strings: ['Graphic Designeing', 'Web Developing', 'Networking ', 'Cyber Security', 'CEH'],
    typeSpeed: 100,
  });
</script>
</body>
```

## 5.4 Test 4: Hover effect

Table 4: Testing hover effect

Objective	To check the hover effect in any part of the website
Action	Navigate to any part of the website and move the cursor to the area where the hover effect is applied.
Expected Result	The hover effect should appear
Actual Result	The hover effect successfully appeared
Test	Test successful

Below are the screenshots used in this testing:

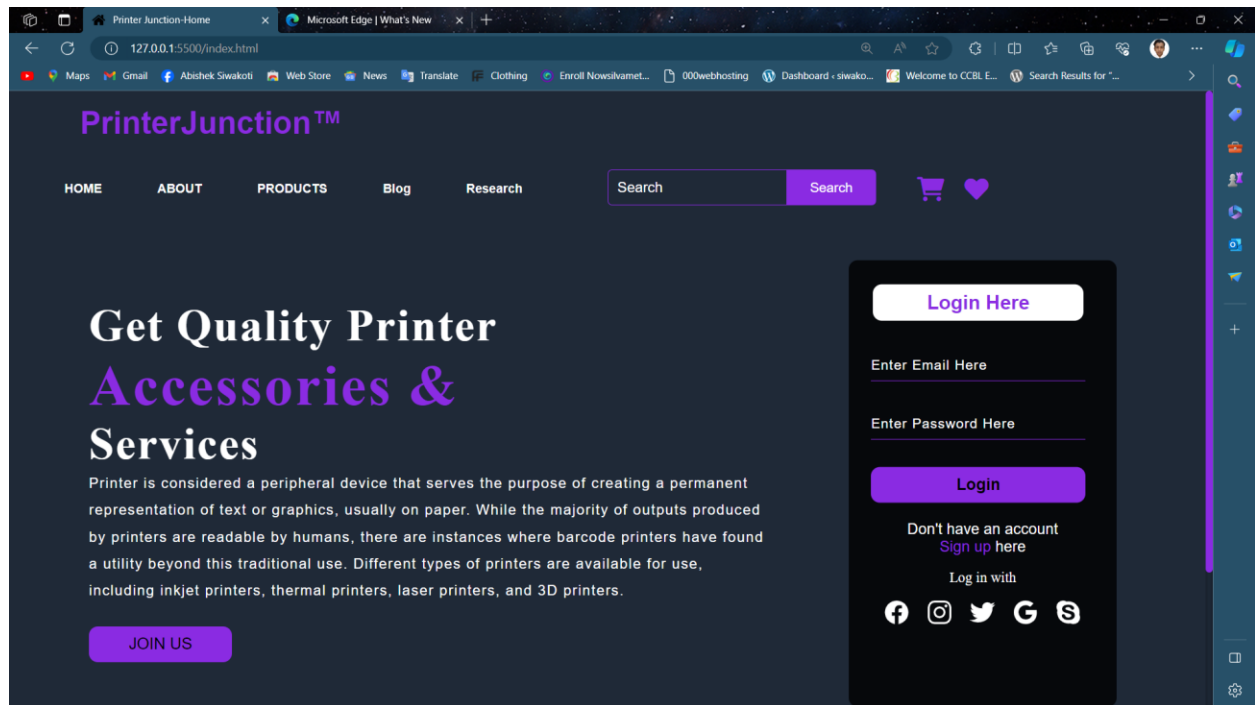

Figure 21: Without hover

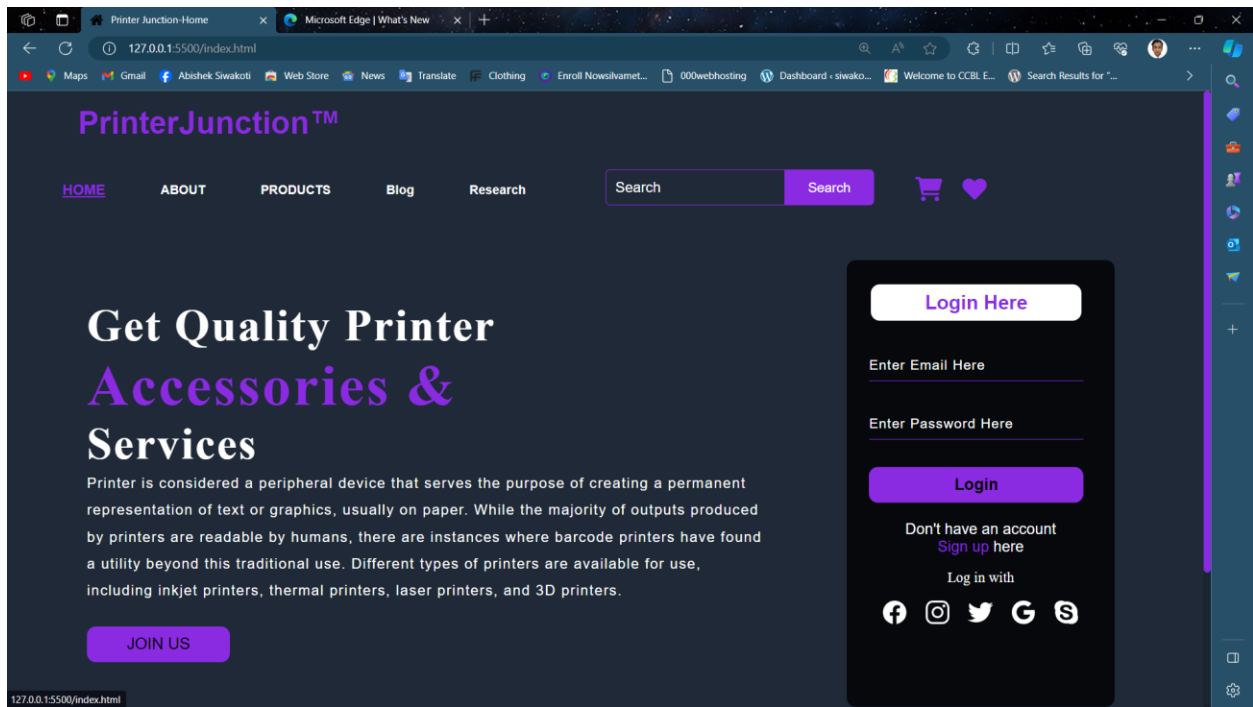

Figure 22: With hover

## 5.5 Test 5: Use of external links

Table 5: Testing external links

Objective	To check that the external link used in this website works properly.
Action	Check all the external links used in this website work properly.
Expected Result	Every external link used in this website should work properly.
Actual Result	Every external link used in this website works properly.
Test	Test successful

Some of the screenshots for this testing are below:

- CDN link, favicon link, and CSS link used in the product page:

```

## 6 Conclusion

This is our first coursework for Information Systems, which covers 60% of the total grade assigned by our lecturer, Mr. Binaya Koirala. We extend our gratitude to our module leader for providing guidance and support throughout this project. Special thanks to various YouTubers whose tutorials and insights inspired and shaped our development skills. Platforms like Daraz served as valuable references, and we appreciate the wealth of knowledge shared by the module leader and friends. Our team's hard work, dedication, and seamless collaboration were instrumental in bringing this project to fruition. Despite the challenges, we persevered and learned immensely from overcoming obstacles. This project is a group assignment requiring us to build a website. Throughout the collaborative effort, we've chance to interact with each other, sharing ideas and opinions. Teamwork not only helped us to complete our project but also enhanced our communication skills.

We learned more about the Blasimiq tool and Visual Studio code while working on this project. We also made blueprints for each webpage so we could see how they would look before writing code. This project helped us to implement and learn more about HTML tags, Internal, and external CSS, and the use of JavaScript to create responsive and feature-rich web pages. This coursework has not only enhanced our technical skills but also provided valuable lessons in teamwork, problem-solving, and creativity. We are proud of what we've accomplished and look forward to future endeavors in the dynamic world of web development.

<h1>Get Quality Printer <br><span>Accessories &</span> <br>Services</h1>

<p class="par">Printer is considered a peripheral device that serves the purpose of creating a permanent<br>representation of text or graphics, usually on paper. While the majority of outputs produced<br>by printers are readable by humans, there are instances where barcode printers have found<br>a utility beyond this traditional use. Different types of printers are available for use,<br>including inkjet printers, thermal printers, laser printers, and 3D printers.</p>

  <p style="justify-content: flex-start;">
```

Creating the index page for any website is a crucial task, and finding the right balance between simplicity and attractiveness is key. Despite our extensive research, generating ideas proved challenging initially. Fortunately, inspiration struck when we stumbled upon an image on the internet, providing valuable insights into an effective index page design. We've implemented this inspiration, ensuring our index page is straightforward and user-friendly. Notably, we've included a login form on the index page to prioritize the confidentiality of customer information. We express our gratitude to the creator of the image that sparked our ideas, as it significantly contributed to the design of our website. Our approach involves collecting only essential personal data required to enhance our services and improve user experiences.

<div class="child">

```
<h3 style="color: blueviolet; text-align: center;">Our product page and Daraz product
page</h3>
```

```
<p>After successfully creating our index and about us pages, we encountered a
roadblock when it came to designing our product page. Initially, we struggled to come up
with ideas. However, one day, inspiration struck when we looked at Daraz, Nepal's
leading e-commerce platform. We examined Daraz's website code through inspecting
elements and sought guidance on YouTube to enhance our understanding of creating an
effective product page. Through persistent hard work and dedication, we finally managed
to craft the product page for our website. I want to express sincere gratitude to the
YouTuber and platforms like Daraz, as they played a crucial role in providing the
inspiration and insights we needed to bring our product page to life..</p>

<h3>"The Making of Our Project: Why, How, and Our Dedication"</h3>

<p> Our project began with questions and a spark of creativity. We wanted to understand why things work the way they do and how we could make them better. So, we dove into research, tested ideas, and poured our hearts into every step. Our dedication was unwavering we wanted to create something truly exceptional. This project is our journey, fueled by a passion for innovation and a commitment to pushing limits. It's a testament to our drive to make things not just good, but extraordinary. Thanks to AI assistants like Chat GPT, online resources like W3Schools, e-commerce platforms like Daraz, and YouTubers who provide guidance and inspiration, We were able to gather valuable information, learn

about coding, design elements, and project management, making this project possible. Their wealth of knowledge and insights played a crucial role in achieving our goals.</p>

<h1 style="text-align: center; color: white;">The Evolution of Printers: From Humble Beginnings to Modern Marvels</h1>

<div class="blog-container">

<div class="blog">

<h2>The Past - An Ode to the Early Days of Printing</h2>

<div class="blog-content">

<p>

  &nbsp; &nbsp; &nbsp; &nbsp; &nbsp; &nbsp; In the annals of technological history,  
the printer stands as a silent

witness to a remarkable journey of innovation and progress. The roots of printing  
can be traced back to

ancient China, where woodblocks were used to transfer ink onto paper. Fast  
forward to the 15th century, and

the invention of the printing press by Johannes Gutenberg revolutionized the way  
information was

disseminated.<br>  &nbsp; &nbsp; &nbsp; &nbsp; &nbsp; This mechanical  
marvel allowed for the mass

production of books and played a pivotal role in the Renaissance and the spread  
of knowledge. The subsequent

centuries witnessed the refinement of printing techniques, from the advent of  
lithography to the invention of

the typewriter in the 19th century. However, it wasn't until the late 20th century that  
printers as we know

them today began to take shape. The emergence of dot matrix and inkjet printers  
marked a significant leap

forward, bringing printing capabilities into homes and offices.

<h2>The Present - Printers in the Digital Age</h2>
```

```
<div class="blog-content">
```

```
<p>
```

&nbsp; &nbsp; &nbsp; &nbsp; &nbsp; &nbsp; In today's digital era, printers have undergone a profound

transformation, evolving into sleek, multifunctional devices seamlessly integrated with our daily lives.

Modern inkjet and laser printers deliver high-quality prints with remarkable precision and speed, while

wireless connectivity enables effortless printing from a variety of devices. The advent of 3D printing has

revolutionized manufacturing and unleashed creative possibilities, allowing for the creation of intricate

physical objects layer by layer. The current emphasis on sustainability has also influenced the development of

eco-friendly printers, incorporating energy-efficient technologies and recycled materials. <br>&nbsp; &nbsp;

&nbsp; &nbsp;&nbsp;&nbsp; &nbsp; As we navigate the digital age, printers not only continue to put ink on paper but

also empower us to materialize our ideas in ways that were once unimaginable. With innovations such as mobile

printing apps and cloud-based services, the convenience and accessibility of printing have reached new

heights, making these devices indispensable tools in both professional and personal settings.

                <h1>

                    <p style="font-size: 30px; "> Hi, My name is <span class="purple">Bidur
Siwakoti</span></p>

                    <p style="font-size: 30px; margin-top: -50px;">And I am a Passionate on
<span id="element"></span>

                </p>
```

</h1>

<p style="margin-top: -35px; margin-right: 10px;">I'm from Sunbarshi, Morang, Nepal, currently studying

BIT at Itahari

International College. Programming is my passion, especially when it comes to Kali Linux. I've

delved into Kali Linux and cybersecurity, exploring the intricacies of computer systems. Delving

into various techniques like DDOS attacks, Penetration Testing, Vulnerabilities and Malware

analysis, Digital forensics has been eye-opening and intellectually stimulating. My fascination with

programming intertwines seamlessly with Kali Linux. Leveraging programming languages to craft

scripts and tools within this environment enhances my understanding and proficiency in both coding

and cybersecurity. And the command-line interface in Kali Linux? It's my preferred workspace, where

I feel most empowered, navigating systems with precision and efficiency.</p>

## 8.12 JS used for order conformation message

```
var modal = document.getElementById("myModal");

var btns = document.querySelectorAll(".product_btn");

var span = document.getElementsByClassName("close")[0];

function showModal() {

    modal.style.display = "block";

    // Automatically hide the modal after 3 seconds (adjust the time in milliseconds)

    setTimeout(function() {

        modal.style.display = "none";

    }, 900);

}

// When the user clicks on the button, open the message will display
```

```
for (var i = 0; i < btns.length; i++) {  
    btns[i].addEventListener("click", showModal);  
}  
  
// When the user clicks on x, close the message  
span.addEventListener("click", function () {  
    modal.style.display = "none";  
});  
  
window.addEventListener("click", function (event) {  
    if (event.target == modal) {  
        modal.style.display = "none"; } });
```

### 8.13 JS used for pop-up

```
document.addEventListener("DOMContentLoaded", function () {  
    function handleFormSubmission(event) {  
        event.preventDefault();  
        const isFormSubmitted = true;  
        if (isFormSubmitted) {  
            alert("Thank you! Our customer support team will reach out to you shortly.");  
        } else {  
            alert("Oops! Something went wrong. Please try again.");  
        }  
    }  
}  
  
const orderForm = document.querySelector(".order_main form");
```

```
    orderForm.addEventListener("submit", handleFormSubmission);  
});
```
